Texted numbers, single number contributions and face to face sequences.  
1,730 digits. Collected on the 12<sup>th</sup> and 13<sup>th</sup> of May 2007.

The Number has not yet been subjected to statistical analysis to determine its degree of randomness as, unfortunately, the various funding bodies involved have not been forthcoming in their support. This problem, however, is expected to be resolved in the near future and it should not be long before the results are available to interested parties and institutions.
